

HOW TO USE CASTING SIMULATION FOR DESIGN?

Training at McMaster University, Canada, FEB. 20-22nd 2018

Processes : permanent mold, sand casting, investment casting, **all alloys**

Software : **SOLIDCast™**, **FLOWCast™** and **OPTICast™** by Finite Solutions Inc.

When ? : February 20-21st 9h00 to 16h00 and February 22nd 9h00 to 12h00

Where ? : McMaster Automotive Resource Centre (**MARC**)

200 Longwood Rd S, Room # 266

Hamilton, Ontario , Canada, L8S 1S6

Trainers : David Schmidt from Finite Solutions Inc. (USA) and François Audet from Foundry Solutions Metallurgical Services Inc. (technical support for Canada)

Cost : 500USD/person, training cost will be credited upon software purchase. Seminar is free for McMaster University students.

Why attend? Avoid costly trials and errors, maximize casting quality and minimize production cost. **SOLIDCast™** for solidification defects; **FLOWCast™** for metal flow related defects and **OPTICast™** to optimize metal yield % and process parameters automatically. **Use your evaluation license to solve your challenge.**

What's included : Installation of the software on your laptop for a 45 days evaluation; USB drive with all training material, videos and case studies, lunch on February 20th and 21st, coffee and snacks every day, networking with students.

Contact : François Audet, francois.audet@solutionsfonderie.com, 1 581 990 5308

See you at beautiful McMaster University!
